**Attachments:** CONF\_NFA IC\_RES 024.038.073.115\_O\_Aug 2018.pdf

Hi Lilian,

The NFA/IC status was added by Melanie into the letters that were sent to the property owners for buildings that do not require any further sampling at this time.

The "IC" describes the following:

Certain types of renovations or structural changes can increase a building's likelihood of being affected by vapor intrusion. For example, sealing crawlspace vents may reduce fresh air flow into the home. Drilling holes through the floor for a new toilet or telephone/internet cable can create a new pathway for vapors to enter the home.

I have also attached for you an example NFA/IC letter from 2018 for your reference. If you have any questions, please let me know

Thanks for the productive call this morning!

Best, Cynthia
